Anachronistic

The flourishing romantic ages of the past are recaptured in a distorted new appearance. Fused trims and accessories, where the amorous collides with the high-tech and the energetic. Facet crystal gems and sharp metal studs are used on lace ribbons, guipure inserts and laser cut badges. Button designs resemble antique treasures in futuristic makeovers with mirroring effect coatings, pearlescent sheen and decadent sparkles. Refined lace trims and voluminous ruffled ribbons are light in sculpted transparent layers. Antique metal chains and iron cavalier decorations complete this anachronistic statement.

Silence

The intriguing visual play between shadows and lights. Precise and reduced elegance in beautiful contrasts and translucent sensuality. Discreetly polished structures and refined mélanges in luxury fibres create perfect plain trims. Tech transparencies and bubble or crinkled textures are mixed with neat grids, soft metallic glints and reflective coatings in zippers and ribbons. Soft dégradé shades add light and balanced depth. Rigid laser-cut badges are combined with technical mesh layers, graphic strict pleads and precise repeated beads.
